

Removable Tow Hitch

Suburban Tilt Slide Bodies

HITCH ASSEMBLY

IMPORTANT SAFETY

- **DO NOT** fit safety chains to any removable part of the truck.
- **DO NOT** tilt the tray body with the inner extension tow hitch in the rear receiver. Remove the hitch before tilting or damage may occur.

OPERATING PROCEDURE

- Fit the inner extension tow hitch into the receiver at the rear of the truck.
- Ensure the correct supplied pin is fitted in the locking hole and the spring clip is fitted correctly.
- Connect the trailer to the hitch and ensure the lock is engaged.
- Connect the two safety chains to the fixed points on the body subframe.
- Connect the electrical trailer plug and air lines, if fitted.
- Use the storage location under the side of the vehicle to stow the tow hitch when it is not in use.

BEFORE TOWING

Confirm the hitch lock, retaining pin, spring clip, safety chains and all electrical or air connections are secure.
